

CHIP CHAMPION™

Clean chips and dice are a winner for both the house and player.

High Output Chip Champion

Model CP-7000 CC

High Output Chip Champion with Automatic Feeder

Model CP-7000-S CC

The Bar Maid CHIP CHAMPION™ Casino Chip Cleaning System allows casinos to routinely clean chips, dice and tiles in-house to reduce potential spread of pathogens among staff and players.

Sanitize chips, dice and tiles with an EPA registered multi-purpose quaternary tablet sanitizer (sold separately), then feed up to 160 chips per minute into this portable, stainless steel machine where they are gently scrubbed and dried by hot organic granulate, then exposed to a UV-C light before exiting dry and immediately ready for use.

- **Quaternary Tablet Sanitizer...** Economical tablet sanitizer (sold separately) is easy to store, dissolve in water according to label directions to prepare sanitizing solution on demand.
- **Fast payback...** CHIP CHAMPION models process thousands of chips, dice and tiles per hour. Significantly reducing labor costs of cleaning by hand or expensive chip cleaning services.
- **Increased hygiene...** Routine cleaning reduces potential spread of pathogens and increases chip life as chips look newer longer.
- **Portable...** All CHIP CHAMPION models have a relatively small footprint that fits most work tables or use the optional wheeled cart for easy portability and storage.
- **3 Models...** Choose the CHIP CHAMPION that suits your needs based on volume and available space. The compact model processes 3,000-4,000 chips per hour or 60+ chips per minute. The somewhat larger high output model processes 7,000-9,000 chips per hour or 140+ chips per minute. The high output model, if purchased with the optional Automatic Feeder, will process more than 10,000 chips per hour or 160+ chips per minute.

Compact Chip Champion

Model CP-3000-D CC

Quaternary Tablet Sanitizer

DIS-201 (sold separately)

"The CHIP CHAMPION Casino Chip Cleaning System helps solve the germy casino chip problem that has plagued casinos for years. Routine sanitizing and cleaning reduces potential spread of pathogens and increases chip life, as chips look newer longer. The reduced labor costs versus hand cleaning, and eliminating the need to hire expensive chip cleaning services, translates to a fast ROI."

— George Shepherd, president of Bar Maid Corporation

CHIP CHAMPION™ Casino Chip Cleaning System

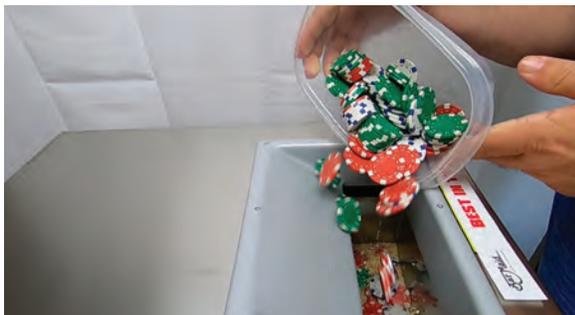

Sanitize, then clean and dry 4,000 to 10,000+ casino chips per hour, depending on CHIP CHAMPION model.

Immerse casino chips, dice and tiles in sanitizer according to label directions, then drain well.

Place into the automatic feeder.

Or feed evenly into machine chute.

They pass through hot organic granulate.

A strategy that helps get clean casino chips, dice and tiles back in play fast!

1. Sanitizer immersion
2. Gentle scrubbing and high heat drying
3. UV-C light exposure

Then exposed to UV-C light.

Clean, dry casino chips, dice and tiles exit the machine, immediately ready for use.
