As the chart above reveals, an Electric Glass Washer and proper chemicals may easily pay for itself. A poorly cleaned glass may leave grease, dirt or soap film that can leave beverages "flat" and create a negative customer experience. A properly cleaned glass allows water to sheet off evenly, leaving it to dry spot and streak free. It also promotes an appealing "head" on the beer that leaves a lace with every sip. Soda and sparkling wine will taste fresher with more fizz. Wine lovers will experience the true color, aroma and taste of fine wines.
