## **OPERATING INSTRUCTIONS**

Cheddar Easy is a cheddar cheese paste that when melted and mixed with five (5) gallons of popped corn produces delicious cheddar cheese popcorn.

Melt Cheddar Easy paste in a double boiler or warmer (something that will heat the cheese **gently**). Apply just enough heat to melt the product. If the temperature of the Cheddar Easy goes above 135° F the product will separate into a lump of cheese solids and a puddle of oil which will render the product useless.

### **TO USE**

1. Remove the Motor Mount Pedestal (Item #4, see Page 3) and the Mixing Pan (#2) from the shipping cartons. Check thoroughly for any damage which may have occurred in transit. Any damage claims should be filed immediately with the transportation company.
2. Secure the Motor Mount Pedestal to the Angled Base (#9) using the Metal Screws (#6), the Lockwashers (#10) and Wing Nuts (#12).
3. Install the Mixing Pan by lowering it onto the Motor Mount Pedestal and making contact with the "O"-Ring (#5). This will keep the Pan from rotating.
4. Slide the Mixing Paddle (#1) onto the Motor Shaft (#17). Make sure the slot in the hub locks onto the Dowel Pin (#3) in the Motor Shaft.
5. Put 5 gallons of popped corn into the Mixing Pan, start the Drive Motor and slowly pour 2 cups (16 oz.) of Cheddar Easy (the cheese should be the consistency of water) onto the popcorn, as the Mixing Paddle tumbles it. In just minutes, the corn will be coated with cheese.
6. After removing the Mixing Paddle, you can lift the Mixing Pan, full of coated corn, off the Motor Mount Pedestal and empty the contents onto a packaging table or into a Servalot Chip Warmer. The coated popcorn will keep all day in this unit.
7. Store the 30 pound tub of Cheddar Easy in a cool dry place and keep sealed. Unopened, this product has a shelf life of six months. After opening, use promptly (heat and humidity will shorten its shelf life).

### **TO CLEAN**

1. Remove the Mixing Paddle and lift off the Mixing Pan.
2. Thoroughly wash both in mild soapy water.
3. Rinse thoroughly.
4. Dry completely.
5. Re-assemble by reversing the first procedure.
