

ITV Ice Makers, Inc.

ITV Ice Makers, Inc. is a U.S based company located in Miami, FL, serving the American and Canadian markets, with the parent company, with it's state of the art manufacturing facility located in Spain.

Since 2009 we have operated our North American facility where we maintain our office, warehouse, service department and administrative personnel. ITV stocks a complete inventory of cube style and flake ice machines as well as filtration systems and parts.

The parent company has been producing ice makers for over 30 years with worldwide distribution to nearly 100 countries and every continent.

ITV's extensive range of ice makers and goal is to strive to meet all possible types of demand, offering many models for different applications, while maintaining the quality and integrity of the ITV brand. Whether the call is for soft, chewable ice, cubes that chill drinks quickly, or gourmet style cubes for the most discerning of consumers, ITV has the right ice maker for your needs.

"Alfa & Gala" Series of Under-Counter, and Self Contained Ice Makers are specially designed for small-space applications, such as bars, guest room floors, refreshment break areas, etc.

ITV's patented "Spray Bar" style evaporator provides crystal clear cubes, melting slowly to help prevent dilution of your drink, due to their unique rectangular and

rounded shapes, adding no impurities to your beverage, thus maintaining the original flavor of your refreshment.

Experience the "European gourmet" ALFA & GALA cubes for the most selective of consumers, yourself.

Ice for Life.
