

ARCTIC BLAST SNO-CONE MACHINE

Our best selling model; the perfect size for concession stands and rental activities. The Arctic Blast is a full-featured machine in our smallest cabinet size, resulting in a portable work-horse. The exclusive blue-tinted polycarbonate panels provide additional protection from the sun, added safety, and a great look. 3-year warranty.

crush

The Arctic Blast was designed to be a low-cost, full-featured machine.

If your needs are high-volume production with easy portability, this model will work well for you. You get the same 500 lb/hr production capacity that our larger cabinet models offer. The stainless-steel blades are adjustable to effect the fineness of the crushed ice.

Just add ice and syrup and generate profits all day!

With Paragon sno-cone machines, you don't have to worry about which model has what motor or certifications.

We use the same heavy-duty motor on all models and every machine is ETL and NSF approved.

So you can make your choice based on functional needs and budget and not worry about quality.
