

PORT-A-BLAST SNO-CONE MACHINE

crush

Our newest model offers exclusive functionality at an incredible low price with no compromise in quality or speed. The same powerful 1/3 HP motor with safety switch control used in our other models is found on this machine. The same 500 lb per hour ice crushing capacity. The same heavy-duty construction. The same 3-year warranty. *The differences—lower cost and specific functionality.*

The Port-A-Blast was designed for the high-volume event concessionaire.

It uses a bus-tub for crushed ice dispensing. Utilization of a two-tub system allows two people to efficiently operate a single machine; one crushes while the other serves, and turn a huge volume in short periods. We should have called this model the “Easy Profit” machine.

Operator side view

New item for 2008.

We use an exclusive one-piece, heavy-duty cabinet to provide long-lasting strength.

The standard bus-tub (made by Rubbermaid) is held off the ground by the cabinet for easy insertion/removal and cleanliness.

Ice Tub

Front view

- Heavy-duty aluminumized metal construction.
- 1/3 HP motor, 500 lb/hr capacity.
- Enclosed motor for maximum protection.
- 22”W x 17”D x 16”H.
- Scoop included.
- Easy-slide NSF approved plastic tub. (one included, additional can be ordered.)
- Optional cup dispenser available (fastens to cabinet).
- Great for high-volume, 2-person operation by using 2 tubs

The heavy-duty construction and simple design of the Port-A-Blast will give you years of trouble-free operation. Backed by Paragon’s exclusive 3-year warranty. Another Paragon product made in the USA and unequalled by the competition.
