

SIMPLY-A-BLAST SNO-CONE MACHINE

Our economy priced alternative to the Arctic Blast. The Simply-A-Blast machine offers the same production capability and dependability as its sister model at a lower cost. We replaced some of the parts with lower cost options. If price and function is more important than looks, this is your machine. 3-year warranty.

crush

Economy, but heavy-duty.

We took the Arctic Blast and replaced the stainless-steel parts with aluminized metal, put in clear tempered glass panels, and made the access door an option. Everything else is identical to the Arctic Blast.

The result is solid durability and a more industrial appearance at a lower cost.

With Paragon sno-cone machines, you don't have to worry about which model has what motor or certifications.

We use the same heavy-duty motor on all models and every machine is ETL and NSF approved.

So you can make your choice based on functional needs and budget only and not worry about quality.
